There are two types of tests that are completed. The first one is a Coliform test and we are required to post that, however, Bess believes that we should post it. The other test is for e-coli and this is required to post. We have never had an e-coli test all of our tests in the past have been positive for Coliform. Bess reported that the concrete base continues to erode and at that point the top will not seal with the base. At that point we will have to replace the base and that will require contact with the DNR, Health Department and other state departments.
